More Buffalo Coming Here

Two Car Loads Have Been Shipped From Montana—Arrive this Week

Missoula, Mont., October 10.—Alex. Ayotte, representing the Canadian government in the round up and shipment of the remainder of the Pablo buffalo herd from the Flathead reservation to the Canadian nation of park at Wainwright, Alberta, loaded twenty-nine animals into two cars for shipment at the Ravalli pens Saturday and today the cars were started for their Canadian destination. Several other buffalo, are to be shipped but no attempt will be made to round them up until later in the season.

The two carloads of buffalo mentioned in the above despatch, will arrive here tomorrow afternoon about four.

The Western Way

Ottawa Paper Says it is Impossible to Damp Our Enthusiasm—Civic Enthusiasm

It is impossible to damp the enthusiasm of the westerner. When E. J. Chamberlain, general manager of the Grand Trunk Pacific, passed through Wainwright, Alta., the other day, en route from Winnipeg to Edmonton he was waited upon by a delegation of the Board of Trade which asked that their town should be selected as the starting point of the branch to Calgary. They were told that the request could not be granted because a place named To-field had already been selected. Were they discomfited? Not a bit. Three of the deputation left at once to drive 35 miles to Hardisty to catch the morning train for Edmonton, in order to bring pressure to bear upon Premier Rutherford and Attorney-General Cross to persuade the G. T. P. to change its plans. How's that for civic enthusiasm?—Ottawa Free Press.

The Tactful Lamp.

In the parlor there were three, Girl, the parlor lamp and he. Two is company no doubt. That is why the lamp went out. —Princeton Tiger.

The C.P. will issue \$30,000,000 additional stock.

Mr. James J. Hill predicts that in 1915 the United States will be buying wheat from Canada. Canada has no objection to becoming the granary of the continent as well as the granary of the Empire. —Regina Leader.

The cement sidewalks have been completed. The work reflects credit on Geo. Richardson Superintendent of Public Works. It is not known as yet what the cost of the walks will be but it is thought they will not come as high as was at first anticipated.

H. V. Fieldhouse is in Edmonton on a business trip.

T. G. Cook returned this morning from a business trip to Edmonton.

The members of the fire brigade had a drill on Monday afternoon, when they tested the new hook and ladder truck purchased by the council.

Several new buildings are projected at present.

IMMIGRATION FROM ONT.

Difficult to Estimate How Many Come to the West—A Fine Class of settlers

It is always hard to figure out just how many Ontario men move west each year, but there is always a large number of them, and this year it is estimated that the total will be over five thousand. The majority of these bring their own stock. They are all men of experience and make the best farmers for the west.

The present year has been noticeable for the small number of foreigners and the large number of Britishers that have come to the country. The majority of the people from the motherland are of the right sort of stuff, and they will turn out good settlers. The quality of failures the year will be smaller than ever, as the majority of the new-comers are in a position to look after themselves.

The prospects for next year look to be exceptionally bright, and already hundreds of inquiries have been received by immigration officials. Several big colonization schemes are under way and thousands of acres of new lands will be broken.

House Meets November 11

The Date Set for Opening—Cabinet Meetings Held Daily—Important Legislation

At a meeting of the cabinet council last week at which all the ministers were present with the exception of Sir Frederick Borden, Hon. Frank Oliver and Hon. Rodolphe Lemieux, who are absent from the capital, the date for the opening of parliament was definitely fixed for Thursday, Nov. 11. The proclamation calling the members will be issued at once. The early assembling of the House should allow business to be well advanced by the Christmas recess, and it is hoped that prorogation may be reached by Easter.

The meeting of the council was the first for some months at which the business of the coming session could be discussed with nearly all the ministers present. As yet the sessional legislative programme is in a somewhat tentative shape, but from now on cabinet meetings will be held almost daily.

The most important legislation of the interior department to be introduced at the approaching session, apart from possible Hudson's Bay railway legislation, will be Frank Oliver's bill to amend and consolidate the Immigration act. The object of the bill is to put the various restrictive measures, promulgated last year by an order in council, in the form of a federal enactment.

The Crop Movement

September Sets a Record—Over \$14,000,000 Worth of Grain Shipped to the Lakes

September made a new record in grain movement for the first month of the crop year. During last month 15,246 cars of wheat were inspected, as compared with 9,847 cars for the corresponding month of last year, or 16,353,220 bushels, as compared with 10,536,290 bushels. Perhaps the most phenomenal part of the inspection is that out of the 15,246 cars, 7,545 were No. 1 northern, and 6,248 No. 2 northern. There were 160 cars of No. 1 hard. All this wheat is not necessarily available for export. Eastern Canada requires a good deal of it, some of course, being exported in the shape of flour.

Every car of wheat or other grain passing eastward is inspected, including all that the big milling companies use at Winnipeg, Kenora, Keewatin and Fort William.

The value of the wheat inspected in September was about \$14,000,000, which shows that the average price for all the different grades was not much below one dollar per bushel. A good deal of this money has already gone into circulation, and general trade is benefitting from it.

What Helps Alberta Helps B. C.

All of the prosperity for Alberta means increased prosperity for British Columbia. The great crops of that province mean greater demand for British Columbia products. That means a great future, a greater Nelson and increased prosperity throughout the interior of the province. Of the thousands who will visit Alberta there are many of them who will also come to British Columbia, and this province will reap a benefit.—Cranbrook Herald.

Calgary Man Shows Marked Ability
in Dissemination of False News--
Wins Recognition by Ananias' Club

The following dispatch, in which there is not a particle of truth, appeared in the papers throughout the west last week: Calgary, Oct. 5.—That Canada's buffalo park at Wainwright no longer exists and that the herd of buffalo secured at Pablo, Montana, by the Canadian government, after so much trouble, is scattered over the prairie, and being gradually driven northward by prairie fires, is the word brought to Calgary to-day by a local anarchist, named Edwards.

Prairie fires have been raging in the Wainwright district for nearly a week, and though the fire fighters were called out in an effort to save the park, they were unsuccessful, the fence being destroyed the 800 buffalo and the herds of elk driven out of the park confines and driven northward by the flames.

It will be a difficult task to corral them, if they have escaped, as Edwards reports, as the country offers them every facility to outwit pursuers.

The losses sustained by homesteaders is even greater than at first reported, the fires having swept over a greater distance than was stated. Hon. Frank Oliver, who is now in the west, will be waited upon by a delegation of homesteaders from the affected areas, and asked to give them a further chance to develop their land, according to the latest requirements, and also to have his department furnish them with seed.

THE PASSENGER SERVICE

General Manager Chamberlin Does
Not Know When the Line
Will be Open

When in Edmonton last week General Manager Chamberlin, of the G. T. P., was interviewed in reference to the opening of their line to Edmonton, and we give his reply below:

As for the freight and passenger service into Edmonton, Mr. Chamberlin said that many things had interfered with the intentions of the railway. As yet the line had not been taken over from the construction department and 2,000 men were wanted between Pembina and Winnipeg, to complete the ballasting of the lines. These men had not been available and yellow labor was objectionable, consequently the work has had to stand. Mr. Chamberlin also said that the terminals at Edmonton could not be put into shape to handle the freight and passenger service that would be offered until matters which have been pending the closing of the street could be given attention.

Memorial To Dr. Melatye

At the Liberal Convention in Wetaskiwin recently a movement was set on foot for the erection of a monument or other memorial to the late Dr. Melatye, M. P., by popular subscription throughout the constituency. The members of Provincial Parliament whose constituencies lie within the Federal riding of Strathcona were appointed a committee to take charge of the matter and arrange all details in connection with the matter.

About the West

It is plain that before long the Canadian west will follow in the steps of the American west, and furnish much of its own monetary requirements instead of drawing as heavily on the east as it now does on the east. At some points in the prairie country already the deposits exceed the discounts. It is probable that the surpluses thus accumulated in western cities will, in time, be absorbed in financial manufacturing industries established to meet local requirements. If the west become a manufacturing as well as an agricultural region, the tariff views of its people will be modified. In any event, the east cannot afford to forget that the vast country between Lake Superior and the Rockies will support an extensive population, with an ever-increasing voice in the national councils. —Toronto News.

Reflections of a Bachelor

The easy things to believe are those that are unbelievable. A woman imagines that she has beauty; a man that he has brains.

A son knows more than anybody in the family until he gets to have a son of his own.

One of the nicest things about a pretty girl is the way she will like you for telling her so.

A woman can lengthen her hair in the telling of about as much as she can shorten her years.

What makes a man lose his temper is for his wife to look astonished when he says he always keeps it.

A man never reaches the highest degree of contentment until he becomes perfectly indifferent, and then he has nothing to live for.

Autumn

Though the autumn's dying glory
Flames along the lordly hill,
Love will tell no mournful story,
Faith not feel the season's chill.

Leaves may fall but with their fading
Steals no life of living tree;
Still, through deeper cells pervading,
Thrills the life we cannot see.

Hush, my heart thy fancies dreary!
Autumn's sadness is a cheat,
For a rest when they are weary,
And their winter sleep is sweet.

Buds beneath the branches dreaming,
Roots that slumber in the snow,
Whisper "Death is but a seeming,"
Life the only truth we know.

WEDNESDAY, OCT. 11, 1900

COMMENT

Boost Wainwright.

Nominations on Wednesday next.

Another glorious Alberta winter is approaching.

The spell of cold weather early this week has caused a revival in the fall business.

The Dominion takes off its hat to Alberta, and this province takes off its hat to Wainwright.

That story of the buffalo escaping must have been induced by overindulgence in seven-year rye.

For the sixty-seventh time since 1884 it is once more announced that "work on the Hudson's Bay railway will start immediately."—Herald.

It turns out that Methuselah was only 78 3/4 years of age when he died. We'll have to change the expression to something like this: "As old as a member of the Canadian senate."—Winnipeg Tribune.

As the returns continue to come in from the outlying parts of the district, of phenomenal yields of grain, we become more convinced of the fact that Wainwright can produce other crops besides buffalo.

In concluding an editorial, dealing with the achievements of Capt. Bernier, the Canadian explorer, the Calgary news says:

"And, strange to relate, Captain Bernier has had no sickness on board, and brings back his ship crew hale and hearty and in fine fettle. Which almost would lead one to believe this grand Canadian climate from the 49th parallel to the 84th is one magnificent health resort where everything would be lovely if the doctors would cease from troubling and the undertakers took a rest."

That the government does not lose all interest in the welfare of the settlers when they are located on the land in this new country, was proven last week when Commissioner of Immigration J. Bruce Walker sent an officer of the department out here to relieve the needs of the settlers who had suffered loss through prairie fires and instructed H. Y. Pawling, President of the local Liberal Association to give immediate relief to any settlers who were in actual need in this section. Fortunately there is no need of government assistance here and the preferred help was not needed. The impression seems to prevail in the east that we have been burned out in this district; such is not the case the suffering being

further west. The citizens, nevertheless, appreciate the prompt action of the department.

This constituency is on the eve of a bye-election; the writ having been issued, calling for nominations on October 30th and voting one week later, on the 27th.

This short campaign is necessary in order to allow the representative to take his seat in the house when it meets on November 11th. As there has been no revulsion of public opinion since the last election, there is no doubt but that the Liberal nominee, J. M. Douglas, of Strathcona, will be returned by acclamation. Mr. Douglas was chosen as the Liberal standard bearer at the most representative convention ever held in the west, and being a man of energy, integrity and tact, he seems well able to occupy the place left vacant by the death of the late Dr. Wilbur McIntyre.

U. S. Tariff a Boomerang

Vancouver News-Advertiser: For once the United States tariff has acted as a boomerang, and instead of the Canadian shingle manufacturers being hit, the effect is felt on the other side of the line. In the recent tariff increases, an advance of 20 cents per thousand was made on shingles imported into the United States. This was intended to stop the entry of shingles from Canada, and it did for a few weeks. As soon as the shingle manufacturers in the United States saw this, they increased their price 20 cents per thousand. The loggers in the United States, since the manufacturers got more for their product, concluded that they themselves were also entitled to more, so they added \$2 per thousand to the cost of the logs. Then the shingle weavers wanted a slice of the melon, and they struck for higher wages, asking a straight day wage instead of piece work. As a result of the latter request, many shingle plants are now idle in the United States, the weavers being on strike.

With all this increase, a reaction has set in. Last week the shingle manufacturers of Vancouver, who ship to the United States, have again been receiving orders and the trade is about equal to what it was before the tariff was altered.

Western Exhibit Wins Prizes

Western Canada's exhibit at the Illinois state fair at Springfield, Ill., took two first prizes and C. W. Speers and W. J. White are congratulating themselves. In five days forty thousand pieces of literature were distributed to inquirers. The exhibit is in the dome of the main building.

A TALE OF A SPOTTED DOG

A small Ratsey boy was once called in to view his new born baby brother. He looked at it over with great interest, and finally asked—Mamma, where did this thing come from?—An angel brought it, Mamma. You see, Mamma, when he came, I certainly thought—Well, then, Mamma, all that I have got to say is that you are dead easy. It is like to see any old fellow put off with a looking glass on his nose. But I reckon we are stuck unless I let my little brother trade it with me for one of his spotted pups.

The Western Spirit

One great characteristic of the Western spirit is that it is impossible to depress it. Depressing circumstances, of which there were over an abundance in the earlier days, never depressed the people in the past, and it is a fairly safe thing to say that they never will in the future.—Premier Rutherford.
